The background portion of the 104(e) attachment was edited by you, so I made the same changes to all 4 letter attachments. Attached you will find the attachment from the Explo letter in total, as well as the question pages from the other 3 attachments. Just let me know if you approve and I'll keep them all moving.

Thank you so much for all your help.

I really need to keep these moving today. Can I send you a word document which included the edits and have you approve that?

Paige, thank you so much for all the edits, I really appreciate the time you took on this project. As you know we are on a FAST TRACK, however, I will get with you on Monday and try to be sure you get a second look. I'll be attending at least part of the OSC meeting.  
Thanks again.

I think the term "Tritonal" needs to be changed to Tritonal and/or Tritonal mixtures throughout all the 104(e) letters; and throughout our correspondence from now on. The material at the EXPLO site is not pure Tritonal. It may or may not have arrived as pure Tritonal. Its' current state is a mixture of Tritonal (which contains aluminum and TNT), TNT, organic materials (pallets, wax, sawdust, etc.). I do not want the language we use to misconstrue or limit our questions and thus limit the information we are provided in return.

I'd really like to get a second look at the EXPLO 104(e) before it goes out, if that's possible. Please let me know if you have objections or need clarification on what I've stated above.

THANKS

Lydia would like for you and Susan to sign off on these letters specifically because they have some programmatic questions. So yes, please do, and I'll get you a final version.

Thanks for EVERYTHING,
